

Generics

Generics is the parent parents topic of collection

Generics allows Java, class, methods and collections to work with type safety.

multiple data type data's in safer storing.

for dynamic data type and automation.

Custom Object :-

for custom class the custom object can get ~~and~~ values as we need like for class student.

Sorting :-

Comparable - Natural way

Comparable(), Collections.sort()

use to sort with unique values.

Comparator - custom sorting logic.
